

▶ NETteller Internet Banking Solution - NEWS

Press Release

Johannesburg, July 3rd 2009. NETinfo, a leading global Banking Solution provider offering the NETinfo NETteller e-banking solution, today announced that SABA Bank, has selected NETteller e-Banking System, for addressing their customers needs in South Africa Region. SABA Bank is implementing the main suite of NETinfo NETteller including WEB Banking , SMS Banking, Mobile Banking , Alerts, and NET-TAN Two Factor Authentication.

The bank felt a strong need to implement a robust e-Banking Strategy, which would enable the bank to transform itself to meet the challenges of the future. The bank was looking for an e- Banking Solution in order to fulfill the heavy demand requested by its Corporate and Retail customers in South Africa.

NETinfo NETteller e-Banking System was chosen due to its modern architecture and the ability to collaborate and interface with any available core banking system providing the freedom to bank's customers to have on their fingertips a business tool with reach functionality.

Business Objectives

- One System supporting all alternative Customer Channels: WEB, SMS, Mobile Banking and PC Banking.
- One system supporting both Retail (consumer) and Corporate functionality.
- Banking System Functionality to be ready in order to minimize possible customizations.
- Fast System Implementation roll out in order to gain critical time-to-market advantage
- Flexible System supporting different Business Rules according to the regulations and the localization needed for each region.
- The system should be based on open architecture in order to ensure tight integration with all delivery channels and core banking systems
- Efficient and flexible system administration.
- Understand the browsing patterns of the users of the Internet to better target products
- System Security
- Reliable Partner

About SABA bank

The South African Bank of Athens Limited ('SABA') was established in 1947 with the objective of servicing the financial needs, supporting and backing the commercial activities of the Hellenes residing in South Africa. The Bank has, however, expanded its horizons to the entire local small-to-medium sized business community, so as to accommodate the multi-lingual and socio-economic changes in South Africa.

The services of SABA Bank are ideally designed to meet the financial requirements of both the individual and corporate clients. The banking professionals of SABA Bank, provide the best of customized service to satisfy the clients. Along with this, the bank also offers innovative banking solutions for its domestic as well as global customers.

Services offered by SABA bank:

- Cheque Account
